III.	Nor	n-establishment of opinion wi	th reg	ard to nove	lty, inventive step	and industr	ial ap	plicabilit	y
1.		The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non- subvious), or to be industrially applicable have not been examined in respect of:							
		the entire international applicat	ion,						
	Ø	claims Nos. 11-13					٠.	:	
		because:							
	⊠ ,	the said international application, or the said claims Nos. 11-13 relate to the following subject matter which does not require an international preliminary examination (specify):							
		see separate sheet							
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so uncle that no meaningful opinion could be formed (specify):							so unclear
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinio could be formed.							
		no international search report has been established for the said claims Nos.							
2.	or a	neaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative structions:							
		the written form has not been furnished or does not comply with the Standard.							
		the computer readable form has not been furnished or does not comply with the Standard.							
٧.		asoned statement under Artic tions and explanations supp				ntive step o	r indı	ustrial ap	plicability;

	Ind	ustrial applicability (IA)	Yes: No:	Claims Claims	1-10,14				
2.	Cita	ations and explanations						n	

see separate sheet

SECTION III:

Claims 11 to 13 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

SECTION V:

- 1) The subject-matter of the claims is novel.
- 2) Closest prior art document is WO-A-02 08217 which describes 3-benzyl-coumarin derivatives.

The subject-matter of the claims differs therefrom in that the 3-position is occupied by a four to seven membered heterocyclic ring.

- Since this substitution is not obvious for the person skilled in the art, the subjectmatter of the claims involves an inventive step.
- 3) For the assessment of the present claims 11 to 13 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
